

Cambodia Vegetable Value Chain Development Project (CVCD)

Heifer International Cambodia implements Cambodia Vegetable Value Chain Development (CVCD) through accelerating the vegetable value chain, affordable, reliable and environmentally sustainable power, water services and digital business platform provided to smallholder farmers, cooperatives and Social Entrepreneurs Union of Agricultural Cooperative (SEUAC).

The project will increase vegetable crop yields through innovative technologies and inputs, including high-quality seeds, solar water pumps, well-managed land, net houses, fertilizers, water improved crop management and extension services.

The project integrates post-harvest management including grading, processing and packaging before vegetables reach the market.

GOAL: 10,150 farmers households earn the sustainable living income by 2027

Project ID KH3108

WHERE

5 Provinces (Kampong Speu, Kampong Chhnang, Takeo, Kampong Thom and Siem Reap)
